ADEC Little Susitna River TAH Data Intensive Sampling.xlsx

Hello Jill. After your meeting yesterday, Cindy mentioned that you'd like to see the "intensive" TAH data for the Little Susitna River. The attached spreadsheet has that data in two tables. The first table is the individual BTEX results for each date and time. The second table adds those together to show the total BTEX for each date and time. You can then use that to calculate daily averages etc. Please let me know if you have questions.

Thanks,

Laura Eldred, Environmental Program Specialist
Alaska Department of Environmental Conservation
Division of Water, Nonpoint Source Section
